Project card

Subject:

Analysis of impact of Convolutional Neural Network structure on the performance

Main assumptions:

- Creating multiple CNNs with different structures to classify CIFAR-10 images
- Measuring and analysing performance of the networks
- Using python, keras and tensorflow to create the networks
  Sources:
- Keras: https://keras.io/
- tensorflow: https://www.tensorflow.org/
- python: https://www.python.org/
- CIFAR-10: https://www.cs.toronto.edu/~kriz/cifar.html
